I want you to make an poster. the format is A4. at the bottom and at the top is a element that has an 2cm height and goes the whole width of the poster. the color of this element is #4b4e69 and is also always on top, so nothing other will be placed here. in the middle ofthe poster is the word JUMP in the color #f1e8e3, written as first row is JU and the second one is MP. this text is always on front of any other content that follows. the font takes up nearly the whole space that isn't the element on the top or bottom. (but it has atleast a spacing of 2cm around). the background color is #22223b. on top of this is the word JUMP written repeatently and follows a wave, it has the color #9a8c98 and is written really small in about 10pt. this text doesn't get inter-rupted from the big JUMP word
